CAREER OBJECTIVE

B.Tech

CCE

Third-year student at SMVEC, aspiring to work as a Developer/Analyst, with skills in Python, Java, SQL, HTML, CSS, Power BI, Azure, and deep learning. Experienced in building AI-based solutions including Deepfake Detection and Depression Detection systems, and advanced to the second round of AI Glow Hackathon (VIT Bangalore) and Smart India Hackathon (SIH). A quick learner with strong problem-solving abilities, motivated to develop scalable, real-world applications.

Depression Detection and Alert Systems

Deepfake Detection

Depression Detection System: Built an AI-powered mental health monitoring system using an NLP-based RoBERTa model to detect depression severity from user text. Integrated a real-time chatbot with FastAPI backend and implemented a Twilio API-based alert system to notify doctors or caregivers during high-risk cases, enabling timely intervention.

Developed an AI-based deepfake detection system using Convolutional Neural Networks (CNNs) to identify manipulated images and videos by learning discriminative visual features, improving detection accuracy and supporting digital media authenticity and misinformation prevention

Sri Manakula Vinayagar Engineering College

B.Tech - Computer and Communication Engineering

2022-2023

Stansford International Higher Secondary School

Higher Secondary - 80%

SSLC - 87.5%

CGPA : 8.57(Upto 4 sem)
